GENERALITAT VALENCIANA 

A photograph of three surgeons in an operating room. They are wearing blue scrubs, blue bouffant caps, and light blue surgical masks. The surgeon on the left is wearing glasses. They are all looking down, focused on their work. A large, circular surgical light fixture is visible in the background, illuminating the scene. The overall color palette is dominated by blues and whites.

Specialists in providing service

At TECNOL HEALTH we have an extensive supply network dedicated to serving different sectors such as healthcare, distribution and business.

A system designed to be truly flexible allows us to meet your individual needs.

Certified Quality

ISO 13485 for Medical Devices

Rigorous **AENOR** certification that internationally accredits the **excellence** of all our manufacturing processes. We provide healthcare products that meet regulatory requirements and also meet the needs of **healthcare professionals and patients.**

Spanish Medicines Agency

We have a manufacturing licence from the Spanish Medicines Agency with a manufacturing plant that maximises production efficiency, complying with all mandatory requirements and certifications.

LEITAT

Our masks are nationally tested by the Spanish homologator LEITAT, which certifies the excellence of the bacterial filtration test results with 99.8%.

Made in Europe

We manufacture our **IIR surgical masks** to be an effective and protective tool against external pathogens, such as **COVID-19**.

We have our **own** production plant located in Spain, in which, through a process certified by **AENOR** with **ISO 13485**, we manufacture under licence from the Spanish Medicines Agency and in compliance with the regulations for the manufacturer described in the **UNE-EN 14883:2019+ AC:2019** standard.

Licensed company:

Certified by the approval authority:

LEITAT

We opted for a **double metallic nose wire** for better fit and flexibility

We use an approved raw material with **3-layer** filtration of 99.8% BFE

We weld the **elastic band** in a way that guarantees the comfort of the user and avoids breakages

Earloop
Maximum elasticity

Double noseclip
Metal and adjustable

Three-layer
Non-woven fabric

Resistance
To splatters

>99%

Available colours

The IIR surgical mask effectively prevents contact with harmful substances in the air with a **filtration of viruses and bacteria $\geq 99\%$** , according to the test carried out by the Spanish certification body LEITAT. **Our masks do not contain graphene or latex.**

Class IIR type	Use Sanitary	BFE (%) >99%
Measures	Adult 175 x 95 mm	Children 145 x 95 mm
differential pressure (Pa/cm ²) < 34	Microbial cleanliness (ufc/g) ≤ 27	Splash resistance pressure (kPa) $\geq 16,0$

The first national surgical mask
factory certified by AENOR with ISO
13485 for Medical Devices.

Personalisation

**Various packaging formats
and private label**

**Customise your order with
your logo or brand** and
turn it into an ideal branding
element in these times.

Design and R+D+i service

At TECNOL HEALTH we offer you a team of designers and technicians specialised in packaging design who will make your product a reality.

Professional consultancy

A qualified professional team will accompany you throughout the process and will advise you whenever you need it on important issues such as the product, the legal content in accordance with current regulations or the most suitable format for your customers.

Tailor-made productions

We control all the processes and finishes from our production plant. You can choose from a wide range of format, colour, marking and packaging options that will adapt the final product to your needs.

Personal protective equipment

We offer maximum protection masks such as FFP2 and FFP3.

Protect yourself and others. This type of mask is named so because it filters out more than 95% of airborne particles and bacteria. Our approved masks retain particles down to 0.6 microns. This is why it is one of the most commonly used to protect against Covid-19, avian flu or influenza among other pathologies.

Prevention

Preventive measures that facilitate the detection of cases of infection and help to stop the spread of the virus are of paramount importance.

Antigen testing and temperature monitoring are part of the recommended health protocols.

With the antigen test we quickly detect the presence of the virus actively in the body by means of a respiratory sample.

Through the use of an infrared thermometer we ensure the daily temperature control of visitors and employees in all types of facilities in a safe way and avoiding direct contact.

The measures used to prevent contagion in all types of facilities are recommended and contribute to maintaining a safer environment for all users.

NASAL ANTIGEN TEST
Self-diagnostic antigen nasal test

- › Result in 15 minutes
- › Minimum purchase: 10 units

Sanitary gowns

At TECNOL HEALTH we are specialists in sanitary material, always offering the highest quality.

Manufactured in non-woven fabric and suitable for use in activities that expose the user to viruses and bacteria in facilities such as ICUs, hospitals, laboratories and the food industry.

We guarantee the quality of our gowns with their corresponding European homologation that certifies their effectiveness and protection.

Protection coveralls

These types of coveralls are considered to be **Category III Personal Protective Equipment**. This category, which is defined according to the risk, indicates that they are suitable for high or even lethal risk, preventing viruses from coming into direct contact with the skin.

All our protective coveralls are certified by a Notified Body, which certifies their quality and effectiveness.

Our protective coveralls are made of highly tear-resistant fabrics, with sewn or taped seams to reduce the risk of leakage.

The coveralls with biological protection comply with the EN 14126 standard.

You will find in this category the highest quality criteria for protective clothing.

Face protection

The ocular mucous membranes can also be a route of infection, so it is important to cover them with appropriate face protection.

The use of eye and face protection prevents contact of respiratory droplets with the mucous membranes of the eyes.

Hand hygiene

Good hand hygiene significantly reduces the risk of infection.

If you are looking for a hydroalcoholic gel that meets all the requirements, our hand sanitiser has 70% ethyl alcohol (ethanol), above the minimum recommended by the Ministry of Health. To ensure proper cleaning without damage or irritation, it has been registered as a guaranteed cosmetic product.

It also has hand soap for professional use, made up of a degreasing hand wash gel, which provides deep cleaning while caring for the skin.

At TECNOL HEALTH we care about your health and your comfort, that's why our hydroalcoholic gel and soap bottles are available in various formats to suit all your needs.
